TMFC039 – Agreement Management

1. Overview

Component Name	ID	Description	ODA Function Block
Agreement Management	TMFC039	The Agreement Management component is responsible for creating, storing, editing, and tracking agreed arrangements with related terms and conditions over a lifecycle. The component manages offers, records acceptance, and associated considerations and intentions to establish agreements as legally binding. This component also provides workflows and templates that facilitate collaboration, communication and negotiation of agreements between parties, and administers the translation of agreements into contracts, when required. It provides secure storage, version control, compliance management, and renewal notifications for agreements.	Party Management

2. eTOM Processes, SID Data Entities and Functional Framework Functions

2.1. eTOM L2 - SID ABEs links

2.2. eTOM business activities

eTOM business activities this ODA Component is responsible for:

Identifier	Level	Business Activity Name	Description
1.6.5	L2	Party Agreement Management	Party Agreement Management manages all aspects of agreements with parties, including customers. Agreements include: / Purchasing agreements for products, services, and resources that meet the enterprise's needs / On-boarding agreements for a Party's offerings / Service Level Agreements with one or more other parties / Agreements to use a Party as a sales channel / Reusable template agreements that can be used to create any of the above.
1.7.14	L2	Enterprise Governance	Enterprise Governance business process manages activities that ensure accountability and control of the strategic direction of the organization.

1.7.14.5	L3	Manage Contract	Manage Contract business activity is in charge of managing agreements, from their creation through to their execution by chosen party, as well as the termination of contracts. / / Manage Contract business activity cover tasks that include managing contract creation, execution of contracts, analysis of contracts to maximize operational and financial performance and reducing financial risk.
----------	----	-----------------	---

2.3. SID ABEs

SID ABEs this ODA Component is responsible for:

SID ABE L1	SID ABE L1 Definition	SID ABE L2 (or set of BEs)	SID ABE L2 Definition
Agreement	One form of business interaction in which Parties (for example, Service Providers or Customers) engage is an agreement. An agreement is a contract or arrangement, either written or verbal and sometimes enforceable by law, such as a service level agreement or a customer price agreement. An agreement involves a number of other business entities, such as Products, Services, and/or Resources.	Agreement	A type of BusinessInteraction that Represents a contract or arrangement, either written or verbal and sometimes enforceable by law.
Agreement	One form of business interaction in which Parties (for example, Service Providers or Customers) engage is an agreement. An agreement is a contract or arrangement, either written or verbal and sometimes enforceable by law, such as a service level agreement or a customer price agreement. An agreement involves a number of other business entities, such as Products, Services, and/or Resources.	AgreementItem	The purpose for an Agreement expressed in terms of a Product, Service, Resource, and/or their respective specifications, inherited from BusinessInteractionItem.

Agreement	One form of business interaction in which Parties (for example, Service Providers or Customers) engage is an agreement. An agreement is a contract or arrangement, either written or verbal and sometimes enforceable by law, such as a service level agreement or a customer price agreement. An agreement involves a number of other business entities, such as Products, Services, and/or Resources.	AgreementTermOrCondition	Aspects of the LegalyBindingAgreement not formally specified elsewhere in the LegalyBindingAgreement and that cannot be captured elsewhere in a formal notation, or automatically monitored and require a more human level of management.
Agreement	One form of business interaction in which Parties (for example, Service Providers or Customers) engage is an agreement. An agreement is a contract or arrangement, either written or verbal and sometimes enforceable by law, such as a service level agreement or a customer price agreement. An agreement involves a number of other business entities, such as Products, Services, and/or Resources.	AgreementAuthorization	Represents the authorization of an Agreement through its signature. BusinessParticipant responsible for approving an Agreement.
Agreement	One form of business interaction in which Parties (for example, Service Providers or Customers) engage is an agreement. An agreement is a contract or arrangement, either written or verbal and sometimes enforceable by law, such as a service level agreement or a customer price agreement. An agreement involves a number of other business entities, such as Products, Services, and/or Resources.	AgreementApproval	A group of AgreementAuthorizations that materializes the fact that an Agreement has been approved by the participants involved in an Agreement. required from the Business Participants involved in the Agreement.

2.4. Functional Framework Functions

Function ID	Function Name	Aggregate Function Level 1	Aggregate Function Level 2	Function Description
1026	Partner Collaboration Constraints Collection	Purchasing Strategy Management	Purchasing Strategy Definition	Partner Collaboration Constraints Collection function collect external and internal constraints that can impact a partner collaboration. The partner strategy definition is impacted by various factors, like partner's geographical location, governmental regulatory, product and services offered etc. The function also provides capability to consider security and financial risks, environmental and legal issues and existing agreements etc.
1045	Partner Agreement Tracking	Business Partner Management	Business Partner Agreement Management	Partner Agreement Tracking function keeps the association of the partner product offerings with the agreements and tracks anomalies for single products or group of products of the partner.

1043	Partner Agreement Storage and Searching	Business Partner Management	Business Partner Agreement Management	Partner Agreement Storage and Searching function provides the ability to view Partner's existing agreements, search for partner agreements based on meta-data and to search text strings within agreements. The data can also be mined for partner strategy, negotiation, workflow and interaction purposes.
1044	Partner Agreement Implementation	Business Partner Management	Business Partner Agreement Management	Agreement Implementation function provides support for the implementation of the agreement's terms and conditions to be used by related organizations during operations.
1042	Partner Agreement Creation	Business Partner Management	Business Partner Agreement Management	Partner Agreement Creation function provides the functionality to automate the creation of an agreement based on templates or from scratch. The function allows to create and maintain predefined agreement options and templates with terms and conditions (e.g. pricing information, payment clauses, legal texts, etc.) for different purposes and services.

1180	Customer Framework Agreement Approval	Sales Management	Framework Agreement Management	Customer Framework Agreement Approval Function manages all approval of Party Roles involved in the Framework Agreement (Customer Roles as well as CSP roles).
1179	Customer Framework Agreement Definition	Sales Management	Framework Agreement Management	The Customer Framework Agreement Definition Function consists in defining the agreement that describes the commitments and company features valid for associated customer orders. / It defines a subset of catalog offers and products which will be marketed to a customer with particular conditions (configurations of product, rates, discounts, SLA such as availability rate, restoration time guaranties, and associated penalties for the CSP).

363	Product Agreement Storage	Product Agreement Management	Product Agreement Storage	Product Agreement Storage provides functionality necessary to store and make available the Product Agreements. / This function allows: / • to instantiate or update Product Agreement approved by the customer with their party involved, their configuration, their approvals and their status, / • to update Product Agreements status, / • to search and read Product Agreements.
361	Product Agreement Implementation	Product Management	Product Agreement Implementation	Product Agreement Implementation function provides functionality pertaining to the implementation of the Product Agreement (a.k.a. contract) across fulfillment, assurance, and billing according to Product Agreement Specification. / A Product Agreement represents the approval by the Customer and the Vendor of all term or conditions of a ProductOffering.
653	Contract Management	Business Partner Management	Business Partner Agreement Management	Contract Management, including establishment, modification, and termination.

3. TM Forum Open APIs & Events

The following part covers the APIs and Events; this part is split in 3: - List of Exposed APIs - This is the list of APIs available from this component. - List of Dependent APIs - In order to satisfy the provided API, the component could require the usage of this set of required APIs. - List of Events (generated & consumed) - The events which the component may generate are listed in this section along with a list of the events which it may consume. Since there is a possibility of multiple sources and receivers for each defined event.

3.1. API Context Diagram

(SVG source: [TMFC039_API_Context.svg](#) — hand-drawn rather than PlantUML for this one diagram, since PlantUML's automatic layout couldn't give each API its own straight, individually-anchored connector at a chosen height. Generated by the *component-specification-documentation skill's scripts/render_api_context_svg.py*.)

3.2. Exposed APIs

API ID	API Name	Mandatory / Optional	API Version	Resource	Operations

TMF651	Agreement Management API	Mandatory	4	agreement	GET, GET /id, POST, PATCH /id, DELETE /id
TMF651	Agreement Management API	Mandatory	4	agreementSpecification	GET, GET /id, POST, PATCH /id, DELETE /id
TMF701	UNRESOLVED-TMF701	Optional	4	processFlow	POST, GET, GET /id, DELETE
TMF701	UNRESOLVED-TMF701	Optional	4	taskFlow	PATCH, GET, GET /id

3.3. Dependent APIs

API ID	API Name	API Version	Mandatory / Optional	Resource	Operations
TMF632	Party Management API	5	Mandatory	individual	GET, GET /id
TMF632	Party Management API	5	Mandatory	organization	GET, GET /id
TMF632	Party Management API	4	Mandatory	individual	GET, GET /id
TMF632	Party Management API	4	Mandatory	organization	GET, GET /id
TMF669	Party Role Management API	5	Optional	partyRole	GET, GET /id
TMF669	Party Role Management API	4	Optional	partyRole	GET, GET /id

TMF620	Product Catalog Management API	5	Optional	productOffering	GET, GET /id
TMF620	Product Catalog Management API	5	Optional	productOfferingPrice	GET, GET /id
TMF620	Product Catalog Management API	4	Optional	productOffering	GET, GET /id
TMF620	Product Catalog Management API	4	Optional	productOfferingPrice	GET, GET /id
TMF637	Product Inventory Management API	5	Optional	product	GET, GET /id
TMF637	Product Inventory Management API	4	Optional	product	GET, GET /id
TMF667	Document Management API	4	Optional	document	GET, GET /id
TMF701	UNRESOLVED-TMF701	4	Optional	processFlow	POST, GET, GET /id, DELETE
TMF701	UNRESOLVED-TMF701	4	Optional	taskFlow	PATCH, GET, GET /id

3.4. Events

The diagram illustrates the Events which the component may publish and the Events that the component may subscribe to and then may receive. Both lists are derived from the APIs listed in the preceding sections.

Published Events

API ID	API Name	Event Resources
TMF651	Agreement Management API	agreementCreateEvent agreementAttributeValueChangeEvent agreementStateChangeEvent agreementSpecificationCreateEvent agreementSpecificationAttributeValueChangeEvent

Subscribed Events

API ID	API Name	Event Resources
TMF632	Party Management API	individualDeleteEvent organizationDeleteEvent

4. Machine Readable Component Specification

Refer to the ODA Component Directory on the TM Forum website for the machine-readable component specification files for this component.

5. References

5.1. TMF Standards related versions

Standard	Version(s)
eTOM	v23.0
SID	v25.0
Functional Framework	v23.0

5.2. Jira References

eTOM [ISA-756] Review eTOM business activities related to agreement and or contract management - TM Forum JIRA

In eTOM 22.5 we have: - In Business Partner Domain: L2 – Party Agreement Management (1.6.5). - Its definition includes "all aspects of agreements with parties, including customers"

which seems to be an anomaly: we should have distinct business activities related to customer and partners - Its definition also includes "Purchasing agreements for products, services and resources that meet the enterprise's needs": whatever the enterprise will need for its internal activities, it will always order products and product offerings to its suppliers or partners (neither services nor resources). - And "Applicable sub-processes are also used by other processes, such as Product Offering Agreement Management and Party Privacy Agreement Management.": Product Offering Agreement Management - In Customer Domain: nothing related to agreement and/or contract management (except for Privacy) - In Product Domain: L4 – Product Offering Agreement Management (1.2.7.2.4) in L3 – Product Offering Development & Retirement (1.2.7.2) in L2 – Product Specification & Offering Development & Retirement (1.2.7), with the following definition: "Develop a template agreement that defines the terms/conditions associated with a product offering." - In Market Sales Domain: L3 – Negotiate Sales/Contract (1.1.9.5) in L2 - Selling (1.1.9). Refer to ISA-711 ticket already created. - In Enterprise domain: L3 Manage Contract (1.7.14.5) in L2 Enterprise Governance (1.7.14) which definition is very generic: "Manage Contract business activity is in charge of managing agreements, from their creation through to their execution by chosen party, as well as the termination of contracts."

We need to have a clear set of business activities, defined at consistent levels and able to manage the different types of agreement and/or contract specification, and their instantiations in their related business context.

SID [ISA-757] Review SID Agreement ABE - TM Forum JIRA

Describe all the types of agreements and contracts needed by a CSP, such as framework agreements, employees' contracts, suppliers' contracts, customer contracts with their specific links to other BEs such as catalogs. Clarify the difference between agreement and contract terms. Remove the positioning of the Agreement BE as specialization of Business Interaction and replaced it by clear and explicit relationships to Party and Party Roles. Review the Service Level Agreement part of the ABE: SLA and SLA conditions can be better described as product specification and configuration, with their scope of application on other products, and their rating rules through the product offering subscribed. Review the definition of BEs such as AgreementTermOrCondition or AgreementItem (not meaningful to link to Service or Resource levels).

5.3. Further resources

6. Administrative Appendix

6.1. Document History

6.1.1. Version History

Version Number	Date	Modified by	Description of changes
1.0.0	13-Jun-2023	Matteo Destino	Initial draft for Rights and Permissions component, with eTOM, SID and Open API mapping
1.0.0		Amaia White	Final edits prior to publication
1.0.1	25-Jul-2023	Ian Turkington	No content changed, simply a layout change to match template 3. Separated the YAML files to a managed repository.
1.0.1	14-Aug-2023	Amaia White	Final edits prior to publication
1.1.0	27-Aug-2024	Gaetano Biancardi	New Component template applied. Exposed API: removed: TMF688 Event Management. Dependant API: removed: TMF688 Event Management. Functional Framework Function, following functions added: Customer Framework Agreement Approval 1180, Customer Framework Agreement Definition 1179, Product Agreement Storage 363, Product Agreement Implementation 361, Contract Management 653, Partner Agreement Creation 1042, Partner Agreement Storage and Searching 1043, Partner Agreement Implementation 1044, Partner Agreement Tracking 1045
1.1.1	09-Sep-2025	Rosie Wilson	Updates to description per agreed YAML updated on 03 Jun 2025. Final administrative updates prior to publication
1.2.0	05-Jun-2026	Hugo Vaughan	Gen 5 API updates
1.2.0	25-Jun-2026	Sannah Sibaya	Final edits prior to publication

6.1.2. Release History

Release Status	Date Modified	Modified by	Description of changes
----------------	---------------	-------------	------------------------

Pre-production	13-Jun-2023	Amaia White	Initial release of document
Pre-production	17-Jul-2023	Adrienne Walcott	Updated to Member Evaluated status
Pre-production	14-Aug-2023	Amaia White	New release of document
Production	06-Oct-2023	Adrienne Walcott	Updated to reflect TM Forum Approved status
Pre-production	06-Sep-2024	Amaia White	New release of document
Production			
Pre-production	09-Sep-2025	Rosie Wilson	v1.1.1
Production	14-Nov-2025	Adrienne Walcott	Updated to reflect TM Forum Approved status
Pre-production	25-Jun-2026	Sannah Sibaya	v1.2.0
