TMFC001 – Product Catalog Management

1. Overview

Component Name	ID	Description	ODA Function Block
Product Catalog Management	TMFC001	The product catalog management component is responsible for organizing the collection of products and product offering specifications that identify and define all requirements of a product or a product offering that can be commercialized.	Core Commerce

2. eTOM Processes, SID Data Entities and Functional Framework Functions

2.1. eTOM business activities

eTOM business activities this ODA Component is responsible for:

Identifier	Level	Business Activity Name	Description
1.2.20	L2	Product Catalog Lifecycle Management	Catalog Lifecycle Management business process covers a set of business activities that enable manage the lifecycle of an organization's catalog from design to build according to defined requirements.
1.1.19	L2	Loyalty Program Management	Define all aspects of a loyalty program, such as requirements and objectives of a loyalty program, determine the benefits to participants. Develop a program, prototype it, test it, rollout/launch it, amend and evaluate it, and terminate it when it is no longer viable for an enterprise.

1.1.19.1	L3	Loyalty Program Development & Retirement	Define all aspects of a loyalty program, such as requirements, its name, and objectives of the loyalty program, determine the benefits to participants. Develop a program, prototype it, test it, rollout/launch it, amend and evaluate it, and terminate it when it is no longer viable for an enterprise.
1.2.7	L2	Product Specification & Offering Development & Retirement	Product Specification & Offering Development & Retirement processes develop and deliver new product specifications as well as enhancements and new features, ready for use by other processes. Additionally, they handle the removal of specifications no longer offered. / Product specifications represent the types of services and resources made available as product offerings to the market by an enterprise. / / The key measures of this process are how effectively the enterprise's offerings are broadened by these specifications or new specification features. These processes also manage updates and enhancements to product specifications. Business case development tracking and commitment are key elements of this process. / / They also develop new product offerings and their associated features. Pricing for the offerings is also developed, such as standard pricing and feature-based pricing. The offerings and selected processes are included in product catalogs which are also developed by these processes.
1.2.8.7	L3	Implement Product Capacity Plan	Implement Product Capacity Plan business activity is in charge of putting into effect the steps needed to achieve Product Capacity plans, with required product capacity, and product capacity management course of action.

1.6.4	L2	Business Partner Offering Development & Retirement	Business Partner Offering Development & Retirement supports the management of on-boarding and off-boarding another Business Partner's product specifications and product offerings that a required to facilitate the business model of the enterprise. / It also manages the involvement the enterprise has with a product specification and product offering. For example, the enterprise may accept an order for one of its offerings, but it may be fulfilled by another Business Partner. / / Note: / - Product Specification Development & Retirement and Product Offering Development & Retirement processes are used to manage most of the lifecycle of product specifications and product offerings. This is done to eliminate redundant processes. For example, the Product Offering Pricing processes are used to manage the prices associated with on-boarded product offerings. / - This process therefore focuses on managing the relationship that parties, including the enterprise, have with product specifications and product offerings as well as the impact of off-boarding specifications and offerings on a provider's service and resource infrastructure.
1.2.8	L2	Product Capacity Management	Product Capacity Management business process manages the activities required to ensure a business is able to plan, model, analyze, optimize, monitor and report product capacity, and related constraints according the commercial objectives in a timely and effective manner.

1.2.22	L2	Product Catalog Content Management	Product Catalog Content Management business process defines and provides the business activities that support the day-to-day operations of Product Catalogs in order to realize the business operations goals. / Product Catalog Content Management business processes include administering the Product Catalog instance in production, maintaining catalog entries, assuring catalogs, managing catalog access, managing entry lifecycle through versioning, handling catalog entity entry and changes, supporting distribution of catalogs as needed, and supporting user-facing activities.
1.2.21	L2	Product Catalog Operational Readiness Management	Product Catalog Operational Readiness Management business process establishes and administers the support needed to operationalize Product catalogs for ongoing day-to-day business needs. / These business activities implement the Product Catalog through Release and Deploy business activities. / Release Product Catalog business activity ensure all cross-functional activities needed to support catalog maintenance and operations, such as training and updating the support of the catalog are in place. / Release Product Catalog business activity includes identifying stakeholders, catalog integration, catalog federation etc. for any scenario in support of the organizations business goals, including Release conditions that support users, customers and business partners.

1.2.19	L2	Product Catalog Planning Management	Product Catalog Planning Management business process covers a set of business activities that understand and enable establish the plan to define, design and operationalize a catalog in order to meet the needs and objectives of Product cataloging. / The Product Catalog Planning Management business process ensures that the organization is able to identify the most appropriate scheme and goal for its catalog. It includes designing the Catalog plan and developing the specification according to Product management requirement.
1.2.23	L2	Product Specification Management	Product Specification Management business process leverages captured product requirements to develop, master, analyze, and update documented standard and personalized conditions that must be satisfied by product design and/or delivery. / Product Specifications Management can result in establishing, in a centralized way, technical (know-how) standards for products. Such standards provide the organization with a means to control and approve the values and inputs of product specification through structure, review, approval and distribution processes to users (including customers and business partners).
1.2.8.7.1	L4	Specify Required Product Capacity	Specify Required Product Capacity business activity is in charge of implementing product capacity plans by identifying clearly and definitely product capacity expectations.

2.2. SID ABEs

SID ABEs this ODA Component is responsible for:

SID ABE Level 1	SID ABE Level 2 (or set of BEs)	SID ABE L1 Definition	SID ABE L2 Definition
Product Offering Specification		The Product Offering Specification ABE describes tangible and intangible goods made available for a certain price to the market in the form of product catalogs. This ABE is also responsible for targeting market segments based on the appropriate market strategy.	<i>(no description available)</i>
Product Specification		The Product Specification ABE contains all that represents a product specification as perceived by the business user and specifies what the marketing operator wants to sell at a functional level (i.e. what are the capacities, which usages are available...).	<i>(no description available)</i>
Product Configuration	ProductConfigSpec	The Product Configuration ABE represents the specification of the different possible Product configurations as well as the Product Configurations instantiated for a Product.	The definition of how a Product operates or functions in terms of CharacteristicSpecification(s) and related ResourceSpec(s), ProductSpec(s), ServiceSpec(s).
Product Usage	Product Usage Specification	Product Usage ABE represents specification of usages enabled by Products and usages of products tracked.	The Product Usage Specification ABE specifies types and characteristics of usage of ProductSpecifications.

Loyalty	Loyalty Program Specification	A loyalty program is one of the tools used by the loyalty process to retain customers. The Loyalty ABE contains all entities useful to specify and instantiate loyalty programs. A LoyaltyProgramProdSpec defines the LoyaltyRules that have to be checked in order to identify the actions to apply. Depending on the type of LoyaltyRules a LoyaltyAccount might be needed to collect gains or not. A LoyaltyProgramProduct is a type of ProductComponent and described by a LoyaltyProgramProdSpec.	The Loyalty Program Specification ABE contains all entities specifying a loyalty program such as LoyaltyProgramProdSpec and LoyaltyRule.
---------	-------------------------------	---	---

Party Product Specification and Offering		The Party Product Specification and Offering ABE contains the entities required to specify the involved parties are playing in business processes related to ProductSpecifications and Product Offerings, such as ordered from and billed by. The sub-ABEs represent the intersection of entities in the two domains. For example, PartyRoleProductOffering is the intersection between the ProductOffering and the PartyRole entities. These ABEs are only needed when a ProductSpecification and ProductOffering are on-boarded and offered to the market by an enterprise or when an offering is procured from another party.	<i>(no description available)</i>
--	--	---	-----------------------------------

TMFC001 eTOM L2 - SID ABEs links

2.4. Functional Framework Functions

Function ID	Function Name	Function Description	Aggregate Function Level 1	Aggregate Function Level 2
3	Repository Entity Relations Configuration	Repository Entity Relations Configuration manages hierarchical, inheritance and reuse relations between catalog entities. Re-usability is a major requirement for management of a catalog. Re-usability is achieved through inheritance and through the re-use of standalone entities as well as entity hierarchies.	Master Data Management	Data Repository Management

4	Repository Entity Grouping Configuration	Repository Entity Grouping Configuration defines the grouping of catalog entities. A catalog user needs flexibility and openness in configuring data catalog entities. One of the configuration options that enable high re-usability is the possibility to group entities and re-use the group level.	Master Data Management	Data Repository Management
6	Repository Entity Data Model Configuration	Repository Entity Data Model Configuration enables the catalog to provide the capability to have a flexible data model with the ability to structure entities and attributes as desired by the user and to extend the model according to the requirements.	Master Data Management	Data Repository Management

11	Repository Entity Hierarchy Management	Repository Entity Hierarchy Management manages rules that governs the relationships between entities in different layers. A catalog that manages different layers needs to maintain the rules within the layer and between the layers. For example, how product definition translate corresponds to different services provisioning rules, and so on.	Master Data Management	Data Repository Management
123	Product Catalog Browsing	Product Catalog Browsing provides a browsing function to identify products available for purchase by a given customer, provide selected relevant information (e.g. cost, requirements, configurable attributes) to the customer. This information will be used in the step guidance.	Product Specification & Offering Management	Product Specification & Offering Development
210	Centralized Ordering Rules Management	Centralized Ordering Rules Management provides centralized business rules for ordering (eligibility, compatibility).	Product Specification & Offering Management	Ordering Rules Development

238	Customer Loyalty Rules Management	Customer Loyalty Rules Management provides Loyalty Program Rules and customer loyalty profiles management	Product Specification & Offering Management	Product Specification & Offering Development
263	Product Compatibility Checking	Product Compatibility Checking function provides an internet technology driven interface for the customer to check product compatibility.	Product Specification & Offering Management	Product Specification & Offering Development
360	Product Agreement Specification Design	Product Agreement Specification Design Function creates and maintains predefined Product Agreement options and templates for Product Offerings. It includes general terms or conditions and approval rules.	Product Specification & Offering Management	Product Specification & Offering Development
407	Product Modeling Support	Product Modeling Support supports Lifecycle Management in the design and build phase of the Product Offerings and Product Specifications.	Product Specification & Offering Management	Product Modeling Support
408	Product Retirement	Product Retirement Function retires obsolete product offering as part of Lifecycle Management (LM).	Product Specification & Offering Management	Product Specification Lifecycle Management
415	Product Strategy linking	Product Strategy Linking links strategy to propositions and links propositions to products	Product Specification & Offering Strategy Definition & Analysis	Product Specification & Offering Strategy Management

649	Product Sourcing Registration	Product Sourcing Registration provides initiation of product instantiation into the service provider product catalog and/or storefront, including product prices.	Business Partner Product Specification and Offering Management	Business Partner Product Specification and Offering Onboarding
650	Partner Product Certification	Partner Product Certification provides product certification/decertification to be an integrated part of the service provider's value proposition.	Business Partner Product Specification and Offering Management	Business Partner Product Specification and Offering Onboarding
662	Sourcing Reference Data Collection	Sourcing Reference Data Collection collects definition of products and services, pricing schemes, partner entities and contracts into the system. Easy uploading of reference data from external sources such as XML files.	Business Partner Product Specification and Offering Management	Business Partner Product Specification and Offering Onboarding

721	Customer Order Rules Configuration	Customer Order Rules Configuration function provides in addition to the Product rules, rules like cross/up sell rules, compatibility rules, eligibility rules, address/service availability rules, etc. Some specific types of rules must be available for all decision-based actions on customer orders. These rules could be customer fraud check, decomposition rules, priority rules, order duplication prevention rules, complex rules involving multi-system checks, etc.	Product Specification & Offering Management	Ordering Rules Development
722	Order Rules Retrieval	Order Rules Retrieval function makes the Order Rules available to e.g. customer order related applications.	Product Specification & Offering Management	Ordering Rules Development
992	Entity Management Notification	Entity Management Notification provides notifications after Entity Management actions to associated applications or application functions.	Master Data Management	Data Repository Management
993	Entity Management Reporting	Entity Management Reporting reports to users or applications with defined and formatted content, scheduled on-demand or subscribed.	Master Data Management	Data Repository Management

1050	Product Onboarding Management	Product Onboarding Management function supports the managing of the onboarding of a Product Offering sourced from an external source e.g. a business partner.	Business Partner Product Specification and Offering Management	Business Partner Product Specification and Offering Onboarding
1053	Onboarded Product Workflows Definition	Onboarded Product Workflows Definition function identifies appropriate workflows related to the use of the onboarded product in fulfillment, assurance and billing.	Business Partner Product Specification and Offering Management	Business Partner Product Specification and Offering Onboarding

1076	Product Specification Design	Product Specification Design Function provides the means to describe for every product commercialized through one or several offers: / • characteristics of the product, and their possible values (ex: speed, volume, duration, phone number, ...) / • available operations (ex: create, change of speed) / • functional incompatibilities or prerequisites (deducted from CFS specification incompatibilities or pre-requisites) / • link with the know-how type (CFS specification) from which the intangible product is a restriction (ex: mobile line, VOIP, ...), or directly with the resource type for tangible products (ex: smartphone, SIM Card), or to the Supplier product type in case of purchase products. / It includes facilities to design a new Product Specification based on an existing one and integrity rules controls. / The Product Catalogue describes, according to strategy, all the tangible and intangible products that can be commercialized through standard offers, loyalty offers. / Example: / • goodies can be sold or offered as a reward in exchange for fidelity points (same product commercialized through 2 offers) / • a special discount can be granted through a retention offer / • ... / A Product Specification restricts a Customer Facing Service Specification (CFSSpec).	Product Specification & Offering Management	Product Specification & Offering Development
------	------------------------------	--	---	--

1077	Product Offering Design	Product Offering Design function provides the means to describe Product Offering, according to marketing strategy: / • commercial name / • packaging rules of the contract: mandatory offers, optional offers, offers that can be ordered in number (ex: 1 to 4 mobile lines) / • commercial incompatibilities or prerequisites (ex: necessary to be the holder of a X contract to subscribe Y contract) / • available commercial operations (ex: contract migration) / • available commitment durations / • any commercial criteria such as authorized sales channel or geographic area, customer criteria, ... / • tariff specifications – and possible alterations. They are associated with the offer, to commercial operations or usage types and can be recurring or one shot. They are expressed as rules that can consider many criteria (ex: commitment duration, product configuration, sales channel, customer's age, ...) and will be evaluated during the order capture process, or during the rating process for usage. / It includes facilities to design a new Product Offering based on an existing one and integrity rules controls.	Product Specification & Offering Management	Product Specification & Offering Development
------	-------------------------	---	---	--

1078	Product Specification and Offering Change Auditing	Product Specification and Offering Change Auditing manages the implications of Product Specifications and Offerings changes to determine the consequences of any given change. Product Specifications and Offerings changes may impact other Product Specifications and / or Offerings according to relationships between them. / The function logs Product Specifications changes and supports the analysis of relationships between Product Specifications. / In addition, it tracks the history of changes in an easy and accessible manner.	Product Specification & Offering Management	Product Specification & Offering Development
------	--	---	---	--

1079	Product Specification and Offering Repository Management	Product Specification and Offering Repository Management is able to create, modify and delete Product Specification and Offering. / This includes the ability to manage the state of an entity during its lifecycle (e.g. planned, deployed, in operation, replaced by, locked...). / It includes Product Specifications and Offerings retrieval, integrity rules check and versioning management. / It also provides Product Specification and Offering views adapted to the different roles.	Product Specification & Offering Management	Product Specification & Offering Development
416	Product Propositions Operations Planning	Product Propositions Operations Planning supports the planning of the introduction of propositions for new or updated product offerings and/or product specifications, by planning which operating groups are delivering what of the product proposition and where are the organization and operations touchpoints.	Product Specification & Offering Strategy Definition & Analysis	Product Specification & Offering Strategy Management

417	Product Strategy to Proposition Alignment	Product Strategy to Proposition Alignment captures and manages details of the business strategy and applies them to the propositions for new or updated product offerings and/or product specifications.	Product Specification & Offering Strategy Definition & Analysis	Product Specification & Offering Strategy Management
418	Product Strategy/Propositions Creation	Product Strategy/Propositions Creation delivers a product strategy and/or propositions for new or updated product offerings and/or product specifications.	Product Specification & Offering Strategy Definition & Analysis	Product Specification & Offering Strategy Management
419	Product Strategy performance reporting	Product Strategy Performance Reporting enables performance reporting of the strategy, driven by the performance of the underlying products.	Product Specification & Offering Strategy Definition & Analysis	Product Specification & Offering Strategy Analysis
897	Building Access Control	Building Access Control checks, stops or allows physical access to facilities according to access roles and rules.	Identification and Permission Management	Permission Control

900	Authorization Control Management	Authorization Control Function controls permissions according to roles and related rules. / It consists in evaluating if a requester is granted permission to act by providing the required evidence. The evidence corresponds to the condition specified for each right (for instance keying the correct password to use a specific mailbox). If the action is protected via a right which is assigned (possibly via a role) to a person, then the person has to be identified to retrieve their rights and verify if the request to act can be granted.	Identification and Permission Management	Permission Control
651	Product Onboarding Support	Product Onboarding Support provides product onboarding, updating, and decommissioning.	Business Partner Product Specification and Offering Management	Business Partner Product Specification and Offering Onboarding

1291	External Product Specification Development	External Product Specification Development function supports the definition of, and sometimes development related to, Product Specifications to be provided either by a Business Partner via the Service Provider or provided with the Business Partner in conjunction with the Service Provider. / This function differs from internal Product Specification Development in that this function addresses both the collaborative aspects of inter-company product specification development and the divisions of responsibilities, costs and benefits among the partners. / This function provides the means to describe for every product commercialized through one or several offers: / - characteristics of the product, and their possible values (ex: speed, volume, duration, phone number, etc.) available operations (ex: create, change of speed) / - functional incompatibilities or prerequisites (deducted from CFS specification incompatibilities or pre-requisites) / - link with the know-how type (CFS specification) from which the intangible product is a restriction (ex: mobile line, VOIP, etc.), or directly with the resource type for tangible products (ex: smartphone, SIM Card), or to the Supplier product type in case of purchase products. / It includes facilities to design a new Product Specification based on an existing one and integrity rules controls. / A Product Specification restricts a Customer Facing Service Specification (CFSSpec).	Product Specification & Offering Management	Product Specification & Offering Development
------	--	--	---	--

1292	External Product Offering Development	External Product Offering Development function includes the definition of, and sometimes the creation of, Product Offerings provided either by a Business Partner via the Service Provider or provided with the Business Partner in conjunction with the Service Provider. / This function differs from internal Product Offering Development in that this function addresses both the collaborative aspects of inter-company product Offering development and the divisions of responsibilities, costs and benefits among the partners. / This function provides the means to describe Product Offerings, according to marketing strategy: / - commercial name / - packaging rules of the contract: mandatory offers, optional offers, offers that can be ordered in number (ex: 1 to 4 mobile lines) / - commercial incompatibilities or prerequisites (ex: necessary to be the holder of an X contract to subscribe Y contract) / - available commercial operations (ex: contract migration) / - available commitment durations / - any commercial criteria such as authorized sales channel or geographic area, customer criteria, etc. / - tariff specifications and possible alterations. They are associated to the offer, to commercial operations or usage types and can be recurring or one shot. They are expressed as rules that can consider many criteria (ex: commitment duration, product configuration, sales channel, customer's age, etc.) and will be evaluated during the order capture process, or during the rating process for usage. / It includes facilities to design a new Product Offering based on an existing one and integrity rules controls.	Product Specification & Offering Management	Product Specification & Offering Development
------	---------------------------------------	---	---	--

1293	Product Specification Recalls Support	Product Specification Recalls Support function supports carrying out follow-through with Service Provider or Business Partner Product Specification Recalls, including notifying customers and, where appropriate, coordinating returns and replacement logistics.	Product Specification & Offering Management	Product Specification Lifecycle Management
1341	Product Specification Change Notification	Product Specification Change Notification function enables notifying systems, stakeholders and involved business partners that a new product specification change is pending. This function is ideally automated but can be a manual notification to those systems and processes that require manual intervention to make a product specification change.	Product Specification & Offering Management	Product Specification & Offering Realization
1342	Product Specification Version Control	Product Specification Version Control function facilitates multiple iterations (versions) of product specifications being kept in production to avoid inconveniencing existing customers of the previous versions.	Product Specification & Offering Management	Product Specification Lifecycle Management

3. TM Forum Open APIs & Events

The following part covers the APIs and Events; this part is split in 3: - List of Exposed APIs - This is the list of APIs available from this component. - List of Dependent APIs - In order to satisfy the provided API, the component could require the usage of this set of required APIs. - List of Events (generated & consumed) - The events which the component may generate are listed in this section along with a list of the events which it may consume. Since there is a possibility of multiple sources and receivers for each defined event.

3.1. API Context Diagram

(SVG source: [TMFC001_API_Context.svg](#) — hand-drawn rather than PlantUML for this one diagram, since PlantUML's automatic layout couldn't give each API its own straight, individually-anchored connector at a chosen height. Generated by the `component-specification-documentation skill's scripts/render_api_context_svg.py`.)

3.2. Exposed APIs

API ID	API Name	Mandatory / Optional	API Version	Resource	Operations
TMF620	Product Catalog Management API	Mandatory	5	productCatalog category exportJob importJob productOffering productOfferingPrice productSpecification	GET GET /id POST PATCH DELETE
TMF620	Product Catalog Management API	Mandatory	4	catalog category productSpecification productOffering productOfferingPrice exportJob importJob	GET GET /id POST PATCH DELETE
TMF701	TMF701	Optional	4	processFlow taskFlow	POST GET GET /id DELETE PATCH
TMF671	Promotion Management API	Optional	4	promotion	GET GET /id POST PATCH DELETE

3.3. Dependent APIs

API ID	API Name	API Version	Mandatory / Optional	Resource	Operations
TMF633	Service Catalog Management API	4	Optional	serviceSpecification	GET GET /id
TMF669	Party Role Management API	5	Optional	partyRole	GET GET /id
TMF669	Party Role Management API	4	Optional	partyRole	GET GET /id
TMF632	Party Management API	5	Optional	individual organization	GET GET /id
TMF632	Party Management API	4	Optional	individual organization	GET GET /id
TMF634	Resource Catalog Management API	5	Optional	resourceSpecification	GET GET /id
TMF634	Resource Catalog Management API	4	Optional	resourceSpecification	GET GET /id
TMF651	TMF651	4	Optional	agreement agreementSpecification	GET GET /id
TMF673	TMF673	4	Optional	geographicAddress	GET GET /id
TMF674	TMF674	4	Optional	geographicSite	GET GET /id

TMF675	TMF675	4	Optional	geographicLocation	GET GET /id
TMF662	TMF662	4	Optional	entitySpecification associationSpecification	GET GET /id
TMF620	Product Catalog Management API	5	Optional	productCatalog category exportJob importJob productOffering productOfferingPrice productSpecification	GET GET /id POST PATCH DELETE
TMF620	Product Catalog Management API	4	Optional	catalog category productOffering productSpecification productOfferingPrice importJob exportJob	GET GET /id POST PATCH DELETE

3.4. Events

The diagram illustrates the Events which the component may publish and the Events that the component may subscribe to and then may receive. Both lists are derived from the APIs listed in the preceding sections.

Published Events

4. Machine Readable Component Specification

Refer to the ODA Component Directory on the TM Forum website for the machine-readable component specification files for this component.

5. References

5.1. TMF Standards related versions

Standard	Version(s)
eTOM	v24.0
SID	v25.0
Functional Framework	v24.0

5.2. Jira References

Functional Framework - ISA-996 - Master Data Management has repurposed catalog related functions (BACKLOG): As part of reviewing the Product, Service and Resource Catalogs to align with the updates to the Functional Framework, a lot of functions have either been removed or re-purposed by Master Data Management, resulting in a decision to remove these functions from the Components: - Removed deleted unclassified functions (1, 2, 5, 7, 9, 10, 12, 14, 15) - Removed functions that used to be related to Catalog management but now have been re-purposed by Master Data Management (3, 4, 6, 11, 13)

Concern: catalog functions may be missing due to re-use of Master Data Management.

Open APIs - Work in progress to create a Product Usage API (as Service Usage and Resource Usage APIs) - when ready, it would be added to the exposed APIs for the usage specification part - [AP-6616] TMF620 - rename ProductOffering into ProductOfferingSpecification - TAC-1289 TMFC001 - update exposed API for TMF767 Product Usage Management - New ticket to be opened: need for an Open API able to offer TaxDefinition

5.3. Further resources

(none currently listed)

6. Administrative Appendix

6.1. Document History

6.1.1. Version History

Version Number	Date	Modified by	Description of changes
1.0.0	28-May-2021	Alan Pope	Final edits prior to publication
1.1.0	07-Oct-2022	Alan Pope	Final edits prior to publication
1.2.0	13-Apr-2023	Amaia White	Final edits prior to publication
1.2.1	25-Jul-2023	Ian Turkington	No content changed, simply a layout change to match template 3. Separated the YAML files to a managed repository.
1.2.1	14-Aug-2023	Amaia White	Final edits prior to publication

2.0.0	23-Apr-2024	Sylvie Demarest	Updated to latest template; aligned with 23.5 SID, eTOM and Functional Framework; simplified eTOM mapping due to new definitions and clarifications (Loyalty Program Mgt and Product Capacity Mgt removed); Product Capacity ABE and Product Test Specification BE removed from the SID mapping (managed by other components); new functions added, definitions and Aggregate Functions classifications updated, functions classified in Master Data Mgt removed as too generic; TMF623 SLA Mgt API removed from the dependent APIs chapter (old API in V2 in Historic API table)
2.0.0	02-May-2024	Amaia White	Final edits prior to publication
2.1.0	12-Nov-2024	Gaetano Biancardi	TMF688 removed from the core specification, moved to supporting functions; TMF672 removed from the core specification, moved to supporting functions; API version, only major version to be specified
2.1.0	26-Nov-2024	Amaia White	Final edits prior to publication
2.1.1	08-Jul-2025	Rosie Wilson	Updates to description per agreed YAML updated on 03-Jun-2025; 5.2.2 added API ticket as requested by Olivier Arnaud
2.1.1	15-Jul-2025	Rosie Wilson	Final edits prior to publication
2.1.2	28-Oct-2025	Gaetano Biancardi, Julien Rouland	Updates to description per agreed YAML updated on 03-Jun-2025; 5.2.2 added API ticket as requested
2.1.2	19-Nov-2025	Rosie Wilson	Final edits prior to publication
2.2.2	28-April-2026	Hugo Vaughan	Gen 5 API update
2.2.2	25-Jun-2026	Sannah Sibaya	Final edits prior to publication

6.1.2. Release History

Release Status	Date Modified	Modified by	Description of changes
Pre-production	28-May-2021	Alan Pope	Initial release of document
Pre-production	05-Jul-2021	Adrienne Walcott	Updated to reflect Member Evaluated status
Pre-production	07-Oct-2022	Alan Pope	Version 1.1.0
Pre-production	13-Apr-2023	Amaia White	Version 1.2.0
