TMFC028 – Party Management

1. Overview

Component Name	ID	Description	ODA Function Block
Party Management	TMFC028	The Party Management component is responsible for the capture, validation and management of Parties. A Party may be an individual or organization that has a relationship with an enterprise. In this context it is responsible for the end-to-end lifecycle of: Individual, Organization and its related sub-entities, Contact Medium, Currency and tax exemption certificates, Identification, and Community.	Party Management

2. eTOM Processes, SID Data Entities and Functional Framework Functions

2.1. eTOM business activities

eTOM business activities this ODA Component is responsible for:

Identifier	Level	Business Activity Name	Description
1.3.16	L2	Customer Inventory Management	Establish, manage, and administer the enterprise's customer inventory, as embodied in the Customer Inventory Database, and monitor and report on the usage and access to the customer inventory, and the quality of the data maintained in it. / Note: validate if the "Customer Inventory Shortcomings" (L3) should be into the scope of this component.

1.3.6	L2	Customer Information Management	Manage customer information after customer contracts or associated service orders have been finalized and during the order completion phase. Ensure that any customer information required by other CRM processes is updated as part of the customer order completion. / Note: validate with eTOM team why CIM is an L2 and not an L3 of Customer Inventory Mgmt.
1.3.4	L2	Customer Relationship Management	Manage the relationship of the Customer and the enterprise.
1.3.4.2	L3	Establish Customer Relationship	Verify the customer identity and manage the customer identity across the Enterprise.
1.3.4.3	L3	Re-establish Customer Relationship	Re-establish customer relationship.
1.3.4.4	L3	Terminate Customer Relationship	Manage termination as appropriate
1.6.3	L2	Party Relationship Development & Retirement	Manage the lifecycles of parties with whom the enterprise has a relationship. Relationship with new parties may be required to broaden the services an enterprise offers, to improve performance, for outsourcing and out-tasking requirements, and so forth.
1.6.3.1	L3	Party Relationship Management	Support the lifecycles (development and retirement) of an enterprise's relationships with parties.
1.6.3.1.5	L4	Collect Party data	Collect data about a Party and/or a Party playing a role. Data includes basic Party data, identification data, contact data, and additional attributes.
1.6.21	L2	Party Inventory Management	Manage the administration of the enterprise's Party inventory.

1.7.7	L2	Human Resources Management	The Human Resources Management process grouping provides the human resources infrastructure for the people resources that the enterprise uses to fulfil its objectives.
1.7.7.2	L3	Develop the Workforce	Support the definition of the organization of the enterprise and coordinate its reorganizations.

2.2. SID ABEs

SID ABEs this ODA Component is responsible for:

SID ABE Level 1	SID ABE Level 2 (or set of BEs)	SID ABE L1 Definition	SID ABE L2 Definition
-----------------	---------------------------------	-----------------------	-----------------------

Party	Party	The Party ABE enables defining an individual, an organization, or an organization unit that is of interest, involved or that provides value directly or indirectly from an enterprise perspective (Enterprise is to be understood here as provider, service provider or operator). Hence the Party plays one or more roles with the enterprise or with another Party playing a role with the enterprise (indirectly). This is introduced to specify that the only party an enterprise would be interested in and will consider in its systems is a party playing a role (directly or indirectly). Roles would be represented by the PartyRole concept. Additional roles will be defined to cover the needs of the new digital ecosystem." Examples of roles played by Parties include those: Of interest, such as competitors, sales prospects Involved, such as customers, users, employees That provides value directly or indirectly, such as service providers, operators, cloud brokers, infrastructure providers, application developers. This Party ABE defines information about companies and people. Implementations of this model are responsible for ensuring that the relevant privacy legislation standards are adhered to in the countries that will use the implementation.	Represents an individual, organization or organization unit. Party is an abstract concept that should be used in places where the business says something can be an organization , organization unit or an individual
-------	-------	--	--

Party	Contact Medium	The Party ABE enables defining an individual, an organization, or an organization unit that is of interest, involved or that provides value directly or indirectly from an enterprise perspective (Enterprise is to be understood here as provider, service provider or operator). Hence the Party plays one or more roles with the enterprise or with another Party playing a role with the enterprise (indirectly). This is introduced to specify that the only party an enterprise would be interested in and will consider in its systems is a party playing a role (directly or indirectly). Roles would be represented by the PartyRole concept. Additional roles will be defined to cover the needs of the new digital ecosystem." Examples of roles played by Parties include those: Of interest, such as competitors, sales prospects Involved, such as customers, users, employees That provides value directly or indirectly, such as service providers, operators, cloud brokers, infrastructure providers, application developers. This Party ABE defines information about companies and people. Implementations of this model are responsible for ensuring that the relevant privacy legislation standards are adhered to in the countries that will use the implementation.	The Contact Medium ABE describes various means by which a PartyRole or PartyAccount/BillingAccountContact can be reached, such as by telephone, fax, email.
-------	----------------	--	--

Party	TaxExemptionCertificate	The Party ABE enables defining an individual, an organization, or an organization unit that is of interest, involved or that provides value directly or indirectly from an enterprise perspective (Enterprise is to be understood here as provider, service provider or operator). Hence the Party plays one or more roles with the enterprise or with another Party playing a role with the enterprise (indirectly). This is introduced to specify that the only party an enterprise would be interested in and will consider in its systems is a party playing a role (directly or indirectly). Roles would be represented by the PartyRole concept. Additional roles will be defined to cover the needs of the new digital ecosystem." Examples of roles played by Parties include those: Of interest, such as competitors, sales prospects Involved, such as customers, users, employees That provides value directly or indirectly, such as service providers, operators, cloud brokers, infrastructure providers, application developers. This Party ABE defines information about companies and people. Implementations of this model are responsible for ensuring that the relevant privacy legislation standards are adhered to in the countries that will use the implementation.	The certificate describing an exemption from tax (partial or complete) granted for a party and/or a place. Examples include: - Party-based - Individual might be exempt due to health or other personal situation - Organization might be exempt due to its business (e.g. a charity, or government) - Location-based - A City might have a global exemption from purchase tax
-------	-------------------------	--	---

Party	Party Identification	The Party ABE enables defining an individual, an organization, or an organization unit that is of interest, involved or that provides value directly or indirectly from an enterprise perspective (Enterprise is to be understood here as provider, service provider or operator). Hence the Party plays one or more roles with the enterprise or with another Party playing a role with the enterprise (indirectly). This is introduced to specify that the only party an enterprise would be interested in and will consider in its systems is a party playing a role (directly or indirectly). Roles would be represented by the PartyRole concept. Additional roles will be defined to cover the needs of the new digital ecosystem." Examples of roles played by Parties include those: Of interest, such as competitors, sales prospects Involved, such as customers, users, employees That provides value directly or indirectly, such as service providers, operators, cloud brokers, infrastructure providers, application developers. This Party ABE defines information about companies and people. Implementations of this model are responsible for ensuring that the relevant privacy legislation standards are adhered to in the countries that will use the implementation.	The Party Identification ABE describes various forms of identification used by individuals and organizations, collectively called parties.
-------	----------------------	--	---

Party	Party Community	The Party ABE enables defining an individual, an organization, or an organization unit that is of interest, involved or that provides value directly or indirectly from an enterprise perspective (Enterprise is to be understood here as provider, service provider or operator). Hence the Party plays one or more roles with the enterprise or with another Party playing a role with the enterprise (indirectly). This is introduced to specify that the only party an enterprise would be interested in and will consider in its systems is a party playing a role (directly or indirectly). Roles would be represented by the PartyRole concept. Additional roles will be defined to cover the needs of the new digital ecosystem." Examples of roles played by Parties include those: Of interest, such as competitors, sales prospects Involved, such as customers, users, employees That provides value directly or indirectly, such as service providers, operators, cloud brokers, infrastructure providers, application developers. This Party ABE defines information about companies and people. Implementations of this model are responsible for ensuring that the relevant privacy legislation standards are adhered to in the countries that will use the implementation.	The Party Community ABE is composed of a Community, which is a PartyRole played by an Organization, CommunityMembers who can commit to a Community, make Contributions to the Community and consume Assets from a Community.

<---	consumed by the activity

2.4. Functional Framework Functions

Function ID	Function Name	Function Description	Aggregate Function Level 1	Aggregate Function Level 2
92	Customer Relation Map Exposure	Customer Relation Map Exposure maps the customer relation/context to systems such as call center or self-service touch.	Customer Information Support	Personalize Customer Profile
369	Customer Data Fencing	Customer Data Fencing provides a security function that will allow e.g., VNO agents or Dealers to view only their own customers. In some cases, the network provider will use the same BSS environment to serve several VNOs (multi tenancy).	Customer Information Support	Customer Information Management

225	Customer Details Management	Customer Details Management; Managing customer details - E.g., name, contact persons for this customer, account managers for this customer, addresses (residence, billing, service address, etc.), contact phone numbers (landline, mobile, fax, etc.).	Customer Information Support	Customer Information Management
400	Customer Information Management	Customer Information Management is a generic function for customer information that also includes functionality for data fencing if accessed by Partner's online access function to make them self-sufficient and avoid the need for them to call the call center for Customer creation and management.	Customer Information Support	Customer Information Management
282	Customer Information Presentation	Customer Information Presentation displays relevant customer information, such as name, account and lifetime value on a persistent customer dashboard.	Customer Information Support	Customer Information Management

226	Customer Preferences Administration	Customer Preferences Administration administers customer proprietary information preferences (CPNI), email versus US Mail, how to be contacted (based on type of communication), web look and feel, do not solicit me. Personalization allows delivery of services that more closely match the customer's need.	Customer Information Support	Customer Information Management
364	Customer/Prospect Data Acquisition	Customer/Prospect Data Acquisition obtains all necessary information to make a sale. The prospect could be a new or current customer. Customer/Prospect Data Acquisition includes information about the service location, billing address, demographic information about the customer, any existing products and services the customer currently has, as well as the customer's needs (requirements).	Customer Information Support	Customer Information Management

233	Customer Actions Profile Updating	Customer Actions Profile Updating updates customer profiling based on implicit and explicit actions, transactions (ex., deriving actual channel preference from a customer whose implicit preference is SMS, not email).	Customer Information Support	Collect & Qualify Customer Information
195	Customers Hierarchy and Group Management	Customer Hierarchy and Group Management function stores the customer hierarchy and/or groups such as company, relationships and household structures. / Manages complex customer relationships such as an individual who performs multiple roles, or hierarchies such as complex corporate structures. This function should be able to deal with several levels of complexity from single service accounts to multinational corporations. Hierarchies are defined by an account type and its relationships with parent and child accounts.	Customer Information Support	Collect & Qualify Customer Information

122	Customer Information Searching	Customer Information Searching search the existing customer base using various criteria (name, address, subscriber number, equipment id, billing account number, etc.) and find the customer record to add the order (using Customer Information Management).	Customer Information Support	Collect & Qualify Customer Information
91	Customer Profile Updating	Customer Profile Updating function concerns the management of our knowledge of the individual customer to keep or produce an up-to-date, accurate and legally compliant Customer information. / It will incorporate into the customer profile, all relevant information gathered through all contacts with the customer.	Customer Information Support	Collect & Qualify Customer Information
121	Registration	Customer Registration registers a new customer if this is a new customer (using Customer Information Management).	Customer Information Support	Collect & Qualify Customer Information

124	Guided Customer Information Capturing	Guided Customer Information Capturing provides a step-by-step guide at the channel to capture the specific information items to be collected (e.g. customer identification, required product / order and the pertinent data for the order). Including Validation guidance – for each information element, may provide set of valid input.	Customer Information Support	Collect & Qualify Customer Information
1032	Partner Group and Hierarchy Definition	Partner Group and Hierarchy Assigning assigns partners to relevant groups and hierarchies and make the grouping available to the concerned organizations within the enterprise.	Business Partner Welcome and interaction	Business Partner Relationship Management
1033	Partner Group and Hierarchy Assigning	Partner Group and Hierarchy Definition defines and creates partner group types and hierarchy criteria in line with the partner strategy to support partner collaboration with the different organizations of the enterprise.	Business Partner Welcome and interaction	Business Partner Relationship Management

1035	Partner Preferences Management	Partner Preferences Management function provide the necessary functionalities to manage partner preferences and partner information details in collaboration with the partner. This includes management of the stored profile information including creation, updating and deletion as well as lifecycle management by supervision of validity and recency.	Business Partner Welcome and interaction	Business Partner Relationship Management
1034	Partner Profile Management	Partner Profile Management function provide the necessary functionalities to manage partner information details for internal usages. This includes management of the stored profile information including creation, updating and deletion as well as lifecycle management by supervision to keep information valid and up to date.	Business Partner Management	Business Partner Relationship Management

1036	Partner Profile Enquiry and Filtering	Partner Profile Enquiry and Filtering function provide the necessary functionalities to inquire stored profiles including filtering to both ensure access based on authority levels and for the convenience for the reader.	Business Partner Management	Business Partner Role Repository Management
1037	Partner Profile Storage	Partner Profile Storage function secure data availability and integrity for the partner profile management.	Business Partner Management	Business Partner Role Repository Management
746	Partner Workflow Management	Partner Workflow Management function provide workflow and orchestration for supplier/partner management activities.	Business Partner Management	Business Partner Role Repository Management

3. TM Forum Open APIs & Events

The following part covers the APIs and Events; this part is split in 3: - List of Exposed APIs - This is the list of APIs available from this component. - List of Dependent APIs - In order to satisfy the provided API, the component could require the usage of this set of required APIs. - List of Events (generated & consumed) - The events which the component may generate are listed in this section along with a list of the events which it may consume. Since there is a possibility of multiple sources and receivers for each defined event.

3.1. API Context Diagram

(SVG source: [TMFC028 API Context.svg](#) — hand-drawn rather than PlantUML for this one diagram, since PlantUML's automatic layout couldn't give each API its own straight, individually-anchored connector at a chosen height. Generated by the component-specification-documentation skill's scripts/render_api_context_svg.py.)

3.2. Exposed APIs

API ID	API Name	Mandatory / Optional	API Version	Resource	Operations

TMF632	Party Management API	Mandatory	5	individual organization	GET GET /id POST PATCH /id DELETE /id Delete /id
TMF632	Party Management API	Mandatory	4	individual organization	GET GET /id POST PATCH /id DELETE /id
TMF701	Process Flow Management API	Optional	4	processFlow taskFlow	GET GET /id POST DELETE /id PATCH /id

3.3. Dependent APIs

API ID	API Name	API Version	Mandatory / Optional	Resource	Operations
TMF669	Party Role Management API	5	Mandatory	partyRole	GET GET /id

TMF669	Party Role Management API	4	Mandatory	partyRole	GET GET /id
TMF673	Geographic Address Management API	4	Optional	geographicAddress	GET GET /id
TMF674	Geographic Site Management API	4	Optional	geographicSite	GET GET /id
TMF675	Geographic Location Management API	4	Optional	geographicLocation	GET GET /id
TMF701	Process Flow Management API	4	Optional	processFlow taskFlow	POST GET GET /id DELETE PATCH GET GET /id

3.4. Events

The diagram illustrates the Events which the component may publish and the Events that the component may subscribe to and then may receive. Both lists are derived from the APIs listed in the preceding sections.

Published Events

API ID	API Name	Event Resources
TMF632	Party Management API	IndividualCreateEvent IndividualAttributeValueChangeEvent IndividualStateChangeEvent IndividualDeleteEvent OrganizationCreateEvent OrganizationAttributeValueChangeEvent OrganizationStateChangeEvent OrganizationDeleteEvent

Subscribed Events

(none listed in the component YAML)

4. Machine Readable Component Specification

Refer to the ODA Component Directory on the TM Forum website for the machine-readable component specification files for this component.

5. References

5.1. TMF Standards related versions

Standard	Version(s)

6. Administrative Appendix

6.1. Document History

6.1.1. Version History

Version Number	Date	Modified by	Description of changes
1.0.0	05-Aug-2022	Gaetano Biancardi, Sylvie Demarest	Final edits prior to publication
1.1.0	07-Oct-2022	Gaetano Biancardi, Sylvie Demarest	Final edits prior to publication
1.2.0	13-Jun-2023	Amaia White	Final edits prior to publication
1.2.1	25-Jul-2023	Ian Turkington	No content changed, simply a layout change to match template 3. Separated the YAML files to a managed repository.
1.2.1	14-Aug-2023	Amaia White	Final edits prior to publication
2.0.0	27-Sep-2023	Gaetano Biancardi	Removed the following exposed API to address an issue identified by the TMF community around TMF629/TMF668 not handling party role for customer and partners: TMF668 Partner Mgmt, TMF629 Customer Mgmt

2.1.0	14-Oct-2024	Gaetano Biancardi	New template applied; exposed API: TMF672 User Roles And Permissions removed (moved to canvas services), TMF688 Event removed (moved to canvas services); dependent API: TMF688 Event removed (moved to canvas services); eTOM removed (per eTOM v23.5): 1.6.3.1 (Party Relationship Management), 1.6.3.1.5 (Collect Party data), 1.6.3 (Party Relationship Development & Retirement); Functional Framework reclassified (per FF v23.5): 1036, 1037, 746, 1032, 1033, 1035, 1034
2.1.0	30-Oct-2024	Amaia White	New version to 2.1.0
2.1.1	09-Jul-2025	Rosie Wilson	Updates to description per agreed YAML updated on 03-Jun-2025
2.1.1	15-Jul-2025	Rosie Wilson	Final administrative updates
2.2.0	24-Jun-2026	Sannah Sibaya	Final edits prior to publishing

6.1.2. Release History

Release Status	Date Modified	Modified by	Description of changes
Pre-production	05-Aug-2022	Goutham Babu	Initial release of document
Pre-production	07-Oct-2022	Alan Pope	Updated to version 1.1.0
Pre-production	07-Nov-2022	Adrienne Walcott	Updated to reflect Member Evaluated status
Pre-production	13-Jun-2023	Amaia White	Updated to version 1.2.0
Pre-production	17-Jul-2022	Adrienne Walcott	Updated to reflect Member Evaluated status
Pre-production	14-Aug-2023	Amaia White	Updated to version 1.2.1
Production	06-Oct-2023	Adrienne Walcott	Updated to reflect TM Forum Approved status
Pre-production	16-Oct-2023	Amaia White	Updated to version 2.0.0

Production	08-Dec-2023	Adrienne Walcott	Updated to reflect TM Forum Approved status
Pre-production	30-Oct-2024	Amaia White	Updated to version 2.1.0
Production	27-Dec-2024	Adrienne Walcott	Updated to reflect TM Forum Approved status
Pre-production	15-Jul-2025	Rosie Wilson	Updated to version 2.1.1
Pre-production	24-Jun-2026	Sannah Sibaya	Updated to version 2.2.0
