# TMFC062 – Resource Configuration and Activation

## 1. Overview

| Component Name                        | ID      | Description                                                                                                                                                                                          | ODA Function Block |
|---------------------------------------|---------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------|
| Resource Configuration and Activation | TMFC062 | The Resource Configuration and Activation component configures and activates resource instances and enables querying of resource instances to acquire the resource activation states and attributes. | Production         |

## 2. eTOM Processes, SID Data Entities and Functional Framework Functions

### 2.1. eTOM business activities

eTOM business activities this ODA Component is responsible for:

| Identifier | Level | Business Activity Name        | Description                                                                                        |
|------------|-------|-------------------------------|----------------------------------------------------------------------------------------------------|
| 1.5.8.2.1  | L4    | Verify Resource Configuration | This process verifies whether the resource configuration matches the appropriate service features. |

### 2.2. SID ABEs

SID ABEs this ODA Component is responsible for:

| SID ABE Level 1 | SID ABE Level 2 (or set of BEs) | SID ABE L1 Definition | SID ABE L2 Definition |
|-----------------|---------------------------------|-----------------------|-----------------------|
|                 |                                 |                       |                       |

|                        |  |                                                                                                                                                                                   |                            |
|------------------------|--|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------------------------|
| Resource Configuration |  | The Resource Configuration ABE represents the specification of the different possible Resource configurations as well as the Resource Configurations instantiated for a Resource. | (no description available) |
|------------------------|--|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------------------------|

### 2.3. eTOM L2 - SID ABEs links

### 2.4. Functional Framework Functions

(none listed in the component YAML)

## 3. TM Forum Open APIs & Events

The following part covers the APIs and Events; this part is split in 3: - List of Exposed APIs - This is the list of APIs available from this component. - List of Dependent APIs - In order to satisfy the provided API, the component could require the usage of this set of required APIs. - List of Events (generated & consumed) - The events which the component may generate are listed in this section along with a list of the events which it may consume. Since there is a possibility of multiple sources and receivers for each defined event.

### 3.1. API Context Diagram

(SVG source: [TMFC062\\_API\\_Context.svg](#) — hand-drawn rather than PlantUML for this one diagram, since PlantUML's automatic layout couldn't give each API its own straight, individually-anchored connector at a chosen height. Generated by the *component-specification-documentation skill's scripts/render\_api\_context\_svg.py*.)

### 3.2. Exposed APIs

| API ID | API Name                                    | Mandatory / Optional | API Version | Resource                                     | Operations                                           |
|--------|---------------------------------------------|----------------------|-------------|----------------------------------------------|------------------------------------------------------|
| TMF702 | Resource Activation Management API          | Mandatory            | 4           | resource                                     | GET<br>GET /id<br>POST /id<br>PATCH<br>DELETE<br>/id |
| TMF664 | Resource Function Activation Management API | Optional             | 4           | resourceFunction<br>heal<br>scale<br>migrate | GET<br>GET /id<br>POST<br>PATCH /id<br>DELETE<br>/id |

### 3.3. Dependent APIs

| API ID | API Name                          | API Version | Mandatory / Optional | Resource              | Operations                                        |
|--------|-----------------------------------|-------------|----------------------|-----------------------|---------------------------------------------------|
| TMF634 | Resource Catalog Management API   | 5           | Mandatory            | resourceSpecification | GET<br>GET /id                                    |
| TMF634 | Resource Catalog Management API   | 4           | Mandatory            | resourceSpecification | GET<br>GET /id                                    |
| TMF639 | Resource Inventory Management API | 4           | Mandatory            | resource              | GET<br>GET /id<br>POST<br>PATCH /id<br>DELETE /id |

### 3.4. Events

The diagram illustrates the Events which the component may publish and the Events that the component may subscribe to and then may receive. Both lists are derived from the APIs listed in the preceding sections.

## Published Events

| API ID | API Name                                    | Event Resources                                                                                                                                                                                                                                                                                                                                                                                                                      |
|--------|---------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| TMF702 | Resource Activation Management API          | ResourceCreateEvent<br>ResourceAttributeValueChangeEvent<br>ResourceStateChangeEvent<br>ResourceDeleteEvent                                                                                                                                                                                                                                                                                                                          |
| TMF664 | Resource Function Activation Management API | ResourceFunctionCreateEvent<br>ResourceFunctionAttributeValueChangeEvent<br>ResourceFunctionChangeEvent<br>ResourceFunctionDeleteEvent<br>HealCreateEvent<br>HealAttributeValueChangeEvent<br>HealChangeEvent<br>HealDeleteEvent<br>ScaleCreateEvent<br>ScaleAttributeValueChangeEvent<br>ScaleChangeEvent<br>ScaleDeleteEvent<br>MigrateCreateEvent<br>MigrateAttributeValueChangeEvent<br>MigrateChangeEvent<br>MigrateDeleteEvent |

## Subscribed Events

| API ID | API Name | Event Resources |
|--------|----------|-----------------|
|--------|----------|-----------------|

|        |                                 |                                                                                                          |
|--------|---------------------------------|----------------------------------------------------------------------------------------------------------|
| TMF634 | Resource Catalog Management API | ResourceSpecificationCreateEvent<br>ResourceSpecificationChangeEvent<br>ResourceSpecificationDeleteEvent |
|--------|---------------------------------|----------------------------------------------------------------------------------------------------------|

## 4. Machine Readable Component Specification

Refer to the ODA Component Directory on the TM Forum website for the machine-readable component specification files for this component.

## 5. References

### 5.1. TMF Standards related versions

| Standard             | Version(s) |
|----------------------|------------|
| eTOM                 | v25.0      |
| SID                  | v25.0      |
| Functional Framework | (none)     |

### 5.2. Jira References
