TMFC008 – Service Inventory

1. Overview

Component Name	ID	Description	ODA Function Block
Service Inventory	TMFC008	The Service Inventory component is responsible for storage and exposure of CFS (Customer Facing Services) that are associated to Product Inventory items. It is also responsible for RFS (Resource Facing Service) definition, mapping between CFS and RFS and mapping with infrastructure/network resources. The Service Inventory component has functionality that enables creation of inventory items, inventory organization, inventory search or filter, inventory monitoring and tracking, inventory control and inventory auditing. The minimum check to be performed at inventory item creation or update is for global consistency with the related Service Catalog information.	Production

2. eTOM Processes, SID Data Entities and Functional Framework Functions

2.1. eTOM business activities

eTOM business activities this ODA Component is responsible for:

Identifier	Level	Business Activity Name	Description
1.4.4	L2	Service Support Readiness	Manage service infrastructure, ensuring that the appropriate service capacity is available and ready to support the SM&O Fulfillment, Assurance and Billing processes.

1.4.4.1	L3	Manage Service Inventory	Establish, manage and administer the enterprise's service inventory, as embodied in the Service Inventory Database, and monitor and report on the usage and access to the service inventory, and the quality of the data maintained in it.
---------	----	--------------------------	--

2.2. SID ABEs

SID ABEs this ODA Component is responsible for:

SID ABE Level 1	SID ABE Level 2 (or set of BEs)	SID ABE L1 Definition	SID ABE L2 Definition
Service		A Service represents an instance of ServiceSpecification. The Service ABE contains entities that are used to represent both types of Services: CSP Know-Hows instances (a.k.a. Customer Facing Services or CFS) and Technical solution (a.k.a. Resource Facing Services or RFS). The Service carries the place where the Service is in use if relevant, as well as configuration characteristics, such as assigned telephone numbers and internet addresses. The Service also tracks the links to Product realized and/or Resources used.	<i>(no description available)</i>

2.3. eTOM L2 - SID ABEs links

2.4. Functional Framework Functions

Function ID	Function Name	Function Description	Aggregate Function Level 1	Aggregate Function Level 2
576	Service Data Retrieval	Service Data Retrieval provides retrieval of appropriate inventory data for example in the context of service end to end testing.	Service Management	Service / Repository Management
593	Service Inventory Repository Updating	Service Repository Updating updates information in the service inventory according to the configuration of specific services	Service Management	Service Repository Management

628	Service to Resource Relationship Management	Service to Resource Relationship Management provides Creation, Update and Deletion of the relations of stand-alone physical or logical resources whose assignment is critical to service's fulfillment, and whose tracking is critical to service operations, assurance, and billing, as well as, resources, which represent a larger resource structure supporting the service, often referred to as an Access Point.	Service Management	Service Repository Management
629	Service to Resource Relationship Synchronization	Service to Resource Relationship Synchronization function entails reconciliation of the data in a Service Inventory Management system with inventory discovered from other sources and synchronizes mismatched service inventory records.	Service Management	Service Repository Management
630	Service-Resource Relationship Management Notifications	Notification of Service-Resource Relationship Management actions to relevant stakeholders	Service Management	Service / Repository Management

964	Onboarded Service Integration Configuration	Onboarded Service Integration Configuration function will configure the on boarded service and the relevant systems to establish integration automatically, when requested. There are several system services in the infrastructure that needs to be aware and integrated with the new service.	Service Management	Service / Repository Management
965	Service Instance Lifecycle Management	Service Instance Lifecycle Management function will control the starting of new instances and closing of instances of a service as well as other activity states of the service instances. / Software based Services' performance and availability may be controlled by managing multiple instances of the service with multiple states of activity.	Service Management	Service Repository Management
1344	Service Topology Discovery	Service Topology Discovery function provides the required capability to discover how resources (e.g. network) are related to each other in providing a service.	Service Management	Service / Repository Management

3. TM Forum Open APIs & Events

The following part covers the APIs and Events; this part is split in 3: - List of Exposed APIs - This is the list of APIs available from this component. - List of Dependent APIs - In order to satisfy the provided API, the component could require the usage of this set of required APIs. - List of Events

(generated & consumed) - The events which the component may generate are listed in this section along with a list of the events which it may consume. Since there is a possibility of multiple sources and receivers for each defined event.

3.1. API Context Diagram

(SVG source: [TMFC008_API_Context.svg](#) — hand-drawn rather than PlantUML for this one diagram, since PlantUML's automatic layout couldn't give each API its own straight, individually-anchored connector at a chosen height. Generated by the *component-specification-documentation skill's scripts/render_api_context_svg.py*.)

3.2. Exposed APIs

API ID	API Name	Mandatory / Optional	API Version	Resource	Operations
TMF638	Service Inventory Management API	Mandatory	5	service	GET GET /id POST PATCH DELETE

TMF638	Service Inventory Management API	Mandatory	4	service	GET GET /id POST PATCH DELETE
TMF701	Process Flow Management API	Optional	4	processFlow taskFlow	POST GET GET /id DELETE PATCH

3.3. Dependent APIs

API ID	API Name	API Version	Mandatory / Optional	Resource	Operations
TMF633	Service Catalog Management API	4	Mandatory	serviceSpecification	GET GET /id
TMF669	Party Role Management API	5	Optional	partyRole	GET GET /id
TMF669	Party Role Management API	4	Optional	PartyRole	GET GET /id
TMF639	Resource Inventory Management API	4	Optional	resource	GET GET /id
TMF638	Service Inventory Management API	5	Optional	service	GET GET /id

TMF638	Service Inventory Management API	4	Optional	service	GET GET /id
TMF673	Geographic Address Management API	4	Optional	geographicAddress geographicSubAddress	GET GET /id
TMF674	Geographic Site Management API	4	Optional	geographicSite	GET GET /id
TMF675	Geographic Location Management API	4	Optional	geographicLocation	GET GET /id
TMF641	Service Ordering Management API	4	Optional	serviceOrder	GET GET /id
TMF632	Party Management API	5	Optional	individual organization	GET GET /id
TMF632	Party Management API	4	Optional	individual organization	GET GET /id

3.4. Events

The diagram illustrates the Events which the component may publish and the Events that the component may subscribe to and then may receive. Both lists are derived from the APIs listed in the preceding sections.

Published Events

API ID	API Name	Event Resources
--------	----------	-----------------

TMF638	Service Inventory Management API	serviceCreateEvent serviceAttributeValueChangeEvent serviceStateChangeEvent serviceDeleteEvent
TMF701	Process Flow Management API	processFlowCreateEvent processFlowStateChangeEvent processFlowStateDeleteEvent processFlowStateAttributeValueChangeEvent taskFlowCreateEvent taskFlowStateChangeEvent taskFlowDeleteEvent taskFlowAttributeValueChangeEvent taskFlowInformationRequiredEvent

Subscribed Events

API ID	API Name	Event Resources
TMF639	Resource Inventory Management API	resourceDeleteEvent
TMF638	Service Inventory Management API	serviceCreateEvent serviceAttributeValueChangeEvent serviceStateChangeEvent serviceDeleteEvent
TMF633	Service Catalog Management API	serviceSpecificationDeleteEvent
TMF669	Party Role Management API	partyRoleDeleteEvent
TMF674	Geographic Site Management API	geographicSiteDeleteEvent
TMF675	Geographic Location Management API	geographicLocationDeleteEvent

TMF632	Party Management API	individualDeleteEvent organizationDeleteEvent
TMF641	Service Ordering Management API	serviceOrderDeleteEvent

4. Machine Readable Component Specification

Refer to the ODA Component Directory on the TM Forum website for the machine-readable component specification files for this component.

5. References

5.1. TMF Standards related versions

Standard	Version(s)
eTOM	v23.0
SID	v25.0
Functional Framework	v23.0

5.2. Jira References

Functional Framework - ISA-416 - Harmonize functions related to Product, Service and Resource Inventories (BACKLOG): harmonize as much as possible functions related to Product, Service and Resource Inventory (under review) - ISA-996 - Master Data Management has repurposed catalog related functions (BACKLOG): as part of reviewing the Product, Service and Resource Catalogs to align with the updates to the Functional Framework, a lot of functions have either been removed or re-purposed by Master Data Management, resulting in a decision to remove these functions from the Components: - Removed deleted unclassified functions (1, 2, 5, 7, 9, 10, 12, 14, 15) - Removed functions that used to be related to Catalog management but now have been re-purposed by Master Data Management (3, 4, 6, 11, 13)

Concern: catalog functions may be missing due to re-use of Master Data Management.

5.3. Further resources

1. IG1228: please refer to IG1228 for defined use cases with ODA components interactions.

6. Administrative Appendix

6.1. Document History

6.1.1. Version History

Version Number	Date	Modified by	Description of changes
1.0.0	31-May-2022	Kamal Maghsoudlou, Sylvie Demarest	Initial release
1.0.1	27-Jul-2023	Ian Turkington	No content changed, simply a layout change to match template 3.
1.0.1	15-Aug-2023	Amaia White	Final updates before publication
1.1.0	14-May-2024	Hugo Vaughan (TM Forum), Sylvie Demarest	Updated to latest template; aligned with 23.5 SID, eTOM and Functional Framework
1.1.0	12-Jul-2024	Amaia White	Final updates before publication

1.2.0	12-Nov-2024	Gaetano Biancardi	TMF688 removed from the core specification, moved to supporting functions; TMF672 removed from the core specification, moved to supporting functions; API version, only major version to be specified
1.2.0	26-Nov-2024	Amaia White	Final updates before publication
1.2.1	08-Jul-2025	Rosie Wilson	Updates to description per agreed YAML updated on 03-Jun-2025; final administrative updates prior to publication
1.3.0	05-Jun-2026	Hugo Vaughan	Gen 5 API updates
1.3.0	05-Jun-2026	Sannah Sibaya	Final edits prior to publication

6.1.2. Release History

Release Status	Date Modified	Modified by	Description of changes
Pre-production	31-May-2022	Goutham Babu	Initial release
Production	22-Jul-2022	Adrienne Walcott	Updated to reflect TM Forum Approved status
Pre-production	15-Aug-2023	Amaia White	New release v1.0.1
Production	06-Oct-2023	Adrienne Walcott	Updated to reflect TM Forum Approved status
Pre-production	12-Jul-2024	Amaia White	New release 1.1.0
Production	30-Aug-2024	Adrienne Walcott	Updated to reflect TM Forum Approved status
Pre-production	26-Nov-2024	Amaia White	New release 1.2.0
Production	07-Mar-2025	Adrienne Walcott	Updated to reflect TM Forum Approved status
Pre-production	08-Jul-2025	Rosie Wilson	New release 1.2.1

Production	05-Sep-2026	Adrienne Walcott	Updated to reflect TM Forum Approved status
Pre-production	05-Jun-2026	Sannah Sibaya	New release 1.3.0; final updates prior to publishing

6.2. Acknowledgements
