TMFC020 – Digital Identity Management

1. Overview

Component Name	ID	Description	ODA Function Block
Digital Identity Management	TMFC020	The Digital Identity Management component is responsible for authentication of parties (customers, employees, partners), and resources authentication.	Party Management

2. eTOM Processes, SID Data Entities and Functional Framework Functions

2.1. eTOM business activities

eTOM business activities this ODA Component is responsible for:

(none listed in the component YAML)

2.2. SID ABEs

SID ABEs this ODA Component is responsible for:

SID ABE Level 1	SID ABE Level 2 (or set of BEs)	SID ABE L1 Definition	SID ABE L2 Definition
Digital Identity		The Digital Identity ABE contains all Business Entities used for enabling identification / authentication of Party or Resource in order to allow Party or Resource to use their permission carried by their roles.	<i>(no description available)</i>

2.3. eTOM L2 - SID ABEs links

(no eTOM business activities are listed for this component in the YAML — see 2.1)

2.4. Functional Framework Functions

Function ID	Function Name	Function Description	Aggregate Function Level 1	Aggregate Function Level 2
1025	Application Access	Application Access provide access interfaces with authentication and authorization control for the requests and responses related to the application's functionality, including event logging and usage statistics.	Identification and Permission Management	Identification and Authentication
906	PKI and Digital Certificates Systems Integration	PKI and Digital Certificates Systems Integration provides integration to Public Key Infrastructure Systems that provides digital certificates, and the support to use public keys and digital certificates.	Identification and Permission Management	Identification and Authentication
899	Single Sign-On Access Control	Single Sign-On Access Control grant access in cooperation with central Authentication and Authorization functions to secure the most updated security.	Identification and Permission Management	Identification and Authentication

1240	Identity Verification	Identity Verification (aka authentication) establishes that an actor (i.e. a person or a resource) is who they purport to be using one or several credentials. / According to the reliability of the credentials used the authentication has a level of authentication such as a biometric credential (i.e. facial recognition or finger print) or multi-factor credential with a high level of authentication or a network credential with a low level of authentication. / Note: each permission specifies the minimum level of authentication required.	Identification and Permission Management	Identification and Authentication
1247	Credentials Establishment	Credentials Establishment creates and/or modifies credentials and associates them with the Digital Identity that will be using them. Credentials can include username/passcode combinations, biometrics, and physical and/or logical passkeys. / Note: A Digital Identity aims to enable identifying Party, Party Roles or Resource Roles.	Identification and Permission Management	Digital Identity Management

1248	Credentials Query	Credentials Query provides the ability to retrieve non-protected information about the Digital Identity of credentials or about the credentials themselves (e.g.name, photo, badge number, token ID, credentials valid dates, etc.).	Identification and Permission Management	Digital Identity Management
------	-------------------	--	--	-----------------------------

3. TM Forum Open APIs & Events

The following part covers the APIs and Events; this part is split in 3: - List of Exposed APIs - This is the list of APIs available from this component. - List of Dependent APIs - In order to satisfy the provided API, the component could require the usage of this set of required APIs. - List of Events (generated & consumed) - The events which the component may generate are listed in this section along with a list of the events which it may consume. Since there is a possibility of multiple sources and receivers for each defined event.

3.1. API Context Diagram

(SVG source: [TMFC020 API Context.svg](#) — hand-drawn rather than PlantUML for this one diagram, since PlantUML's automatic layout couldn't give each API its own straight, individually-anchored connector at a chosen height. Generated by the `component-specification-documentation skill's scripts/render_api_context_svg.py`.)

3.2. Exposed APIs

API ID	API Name	Mandatory / Optional	API Version	Resource	Operations
TMF720	Digital Identity Management API	Mandatory	4	digitalIdentity roles	GET GET /id POST PATCH /id DELETE /id
TMF701	Process Flow Management API	Optional	4	processFlow taskFlow	GET GET /id POST DELETE /id PATCH /id

3.3. Dependent APIs

API ID	API Name	API Version	Mandatory / Optional	Resource	Operations
TMF632	Party Management API	5	Mandatory	individual organization	GET GET /id
TMF632	Party Management API	4	Mandatory	individual organization	GET GET /id
TMF669	Party Role Management API	5	Mandatory	partyRole	POST
TMF669	Party Role Management API	4	Mandatory	partyRole	POST

TMF701	Process Flow Management API	4	Optional	processFlow taskFlow	POST GET GET /id DELETE PATCH
--------	-----------------------------	---	----------	-------------------------	---

3.4. Events

The diagram illustrates the Events which the component may publish and the Events that the component may subscribe to and then may receive. Both lists are derived from the APIs listed in the preceding sections.

Published Events

API ID	API Name	Event Resources
TMF720	Digital Identity Management API	DigitalIdentityCreateEvent DigitalIdentityStateChangeEvent DigitalIdentityDeleteEvent DigitalIdentityAttributeValueChangeEvent

Subscribed Events

API ID	API Name	Event Resources
TMF669	Party Role Management API	partyRoleCreateEvent partyRoleAttributeValueChangeEvent

4. Machine Readable Component Specification

Refer to the ODA Component Directory on the TM Forum website for the machine-readable component specification files for this component.

5. References

5.1. TMF Standards related versions

Standard	Version(s)
eTOM	<i>(none)</i>
SID	v25.0
Functional Framework	v23.5

5.2. Jira References

No open Jira issues currently listed for this component.

5.3. Further resources

1. IG1228: please refer to IG1228 for defined use cases with ODA components interactions.

6. Administrative Appendix

6.1. Document History

6.1.1. Version History

Version Number	Date	Modified by	Description of changes
1.0.0	28-Jun-2022	Gaetano Biancardi, Sylvie Demarest	Final edits prior to publication
1.1.0		Amaia White	Final edits prior to publication
1.0.1	25-Jul-2023	Ian Turkington	No content changed, simply a layout change to match template 3. Separated the YAML files to a managed repository.
1.0.1	14-Aug-2023	Amaia White	Final edits prior to publication
1.1.0	13-May-2024	Gaetano Biancardi	Component Template Update; component refreshed to ODF 23.5 (updates required only for Functional Framework functions); removed TMF688 from exposed and dependent API
1.1.1	15-Sep-2025	Rosie Wilson	Updates to description per agreed YAML updated on 03-Jun-2025; final administrative updates prior to publication
1.2.0	25-Jun-2026	Sannah Sibaya	Final edits prior to publication

6.1.2. Release History

Release Status	Date Modified	Modified by	Description of changes
Pre-production	05-Aug-2022	Goutham Babu	Initial release of document
Pre-production	05-Sep-2022	Adrienne Walcott	Updated to reflect TM Forum Member Evaluated status
Pre-production	14-Aug-2023	Amaia White	New release of document 1.0.1
Production	06-Oct-2023	Adrienne Walcott	Updated to reflect TM Forum Approved status
Pre-production	12-Jul-2024	Amaia White	New release of document 1.1.0

Production	30-Aug-2024	Adrienne Walcott	Updated to reflect TM Forum Approved status
Pre-production	15-Sep-2025	Rosie Wilson	New release of document 1.1.1
Pre-production	25-Jun-2026	Sannah Sibaya	New release of document 1.2.0

6.2. Acknowledgements

This document was prepared by the members of the TM Forum Component and Canvas project team.
